

Wingbeat of my Heart

By Wensdy Whitehead

Recommended Paper: 6-12" (15-30cm) kami.

Fold and unfold.

Bring the two (2) corners to the center and pinch across the diagonal.

Fold each of the two (2) corners to the further pinch mark and unfold.

Bring one (1) corner to the nearest pinch for a new pinch across the diagonal.

Fold the furthest corner to the newest pinch mark.

Refold the existing crease.

Fold the NE corner to the SW corner. Swapping roles may lose the existing pleat.

Refold the existing crease.

Fold along the color-change line on the other side. Unfold.

11.

Fold along the other color-change line on the other side. Unfold.

12.

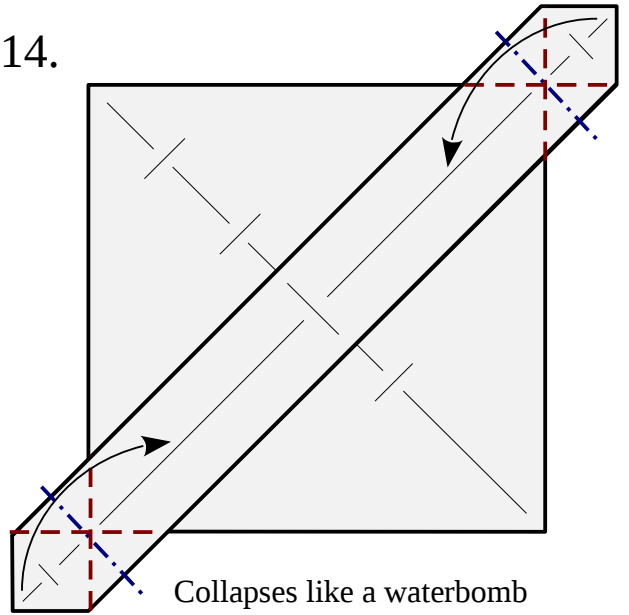

Fold and unfold.

13.

Tiny pinches.

14.

Collapses like a waterbomb or preliminary base.

15.

16.

Fold and unfold.

17.

Pre-crease the top layers but not the two little squares hanging off the corners.

18.

Collapse a preliminary base.

19.

Petal fold the white layers. Repeat behind.

20.

Inside-reverse the neck and tail. Use the more cooperative flap for the tail.

21.

22.

Fold the wing down at an angle through the white obtuse corner by the base of the tail. The angle may be RAT (right about there), but if the new crease is perpendicular to the far white edge, the angle will certainly be good. Repeat behind, matching the angle precisely by folding wingtip to wingtip.

23.

Start to shape the heart. Any of the four corners of the little colorful square can become the top of a heart, but the diagrams pick the north corner. Fold to the pinched center of the square. Repeat behind.

24.

Tiny mountain folds to round the top and sides of the heart. Repeat behind.

25.

Push the wing back up, unfolding the crease from step 22. Repeat behind.

26.

Done! To flap the wings, hold the lower front of the bird and pull the tail straight back.
