

Recommended Paper: kami (thin with contrasting front and back).

By Wensdy Whitehead

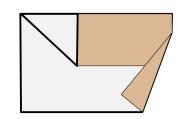

1.

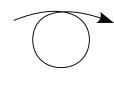

Perpendicular RAT fold at about 1/3 of the height. 2.

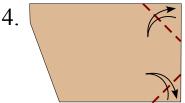

3.

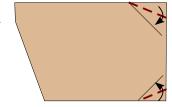

4.

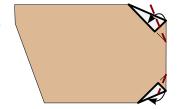

Two (2) RAT folds at about 45°. The northern one is slightly larger than the southern one.

5.

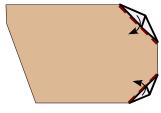

Bisect the angles by bringing the northern and southern edges to lay on the crease lines.

6.

Bisect the other angles by bringing the northern and southern parts of the eastern edge to lay on the crease lines.

7.

Reinstate the existing folds (from step 4).

8.

Two (2) tiny mountain folds to round the eastern-most corners. (Optional.)

9.

Done!
