

# Shallow Dish

By Wensdy Whitehead

Recommended Paper: 3 - 6" (7.5 - 15cm) square. The model also makes a good holder for origami paper of half the width of this piece.

1. Pre-crease.

2. Pre-crease. Leave the last one folded.

4. Tuck the last corner in so all 4 corners match.

5. Pull the corners outward as far as possible and crease.

6. Tuck the last corner under so that all 4 corners match.

7. Pull the inner edges up and out slightly, releasing a little paper in the corner to allow the dish to become 3D.

8. Done!
