

Shamrock

By Wensdy Whitehead

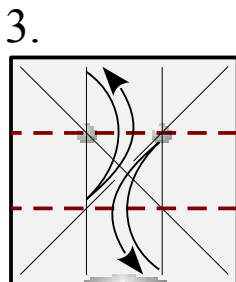

Recommended Paper: green paper-backed foil or other two-sided paper 4" (10cm) square or larger. Kami will work, but should spend some time pressed in an encyclopedia to make it properly flat.

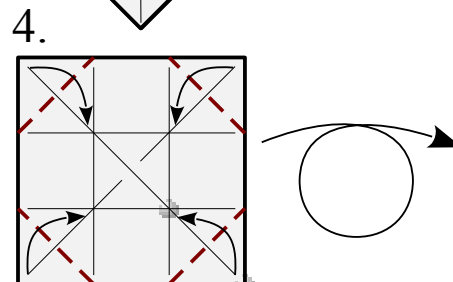

Fold in thirds using the S-method. If folding more than one, use one as a jig.

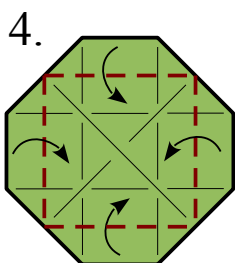

Fold and unfold.

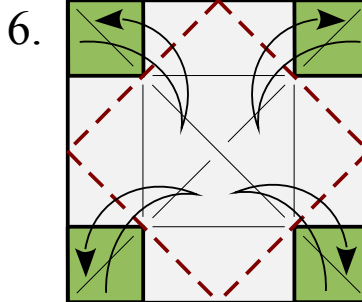

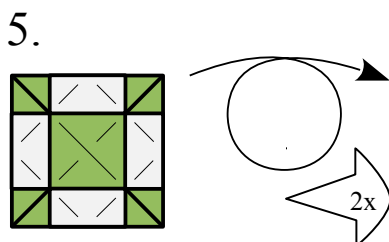

Fold to the far pair of intersections to replicate the thirds horizontally. Unfold.

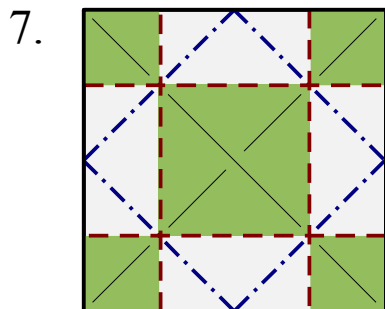

Fold each corner to the nearest intersection.

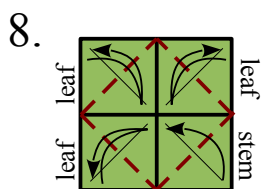

Fold to the thirds lines.

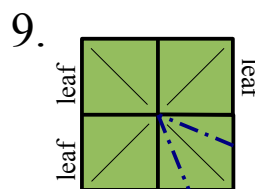

Blintz and unblintz. While blintzed, front and back sport the same color pattern!

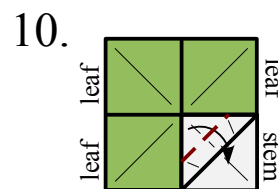

Collapse each corner as a preliminary base.

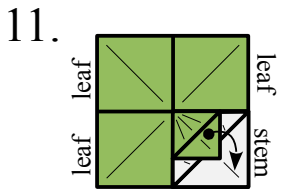

Fold all four (4) small diagonals and unfold just the three (3) leaves. Fold one (1) layer only. If you prefer a four-leafed clover, fold four leaves and no stem!

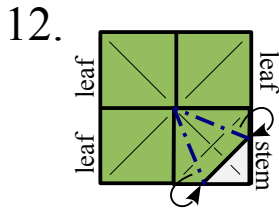

Pre-crease as mountain folds.

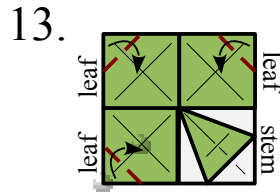

Flatten the bottom of the stem.

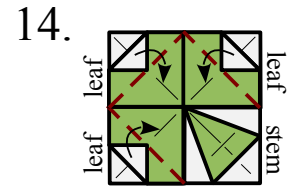

Unfold the diagonal from step 8, allowing the corner protruding beyond the diagonal to flip behind.

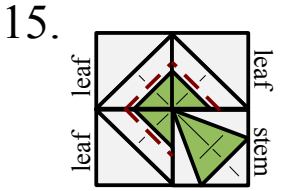

Mountain fold using the pre-creases to narrow the stem.

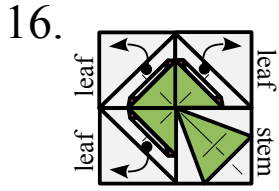

Fold the corners to the centers of the colorful squares.

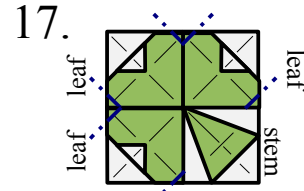

Temporarily refold step 8.

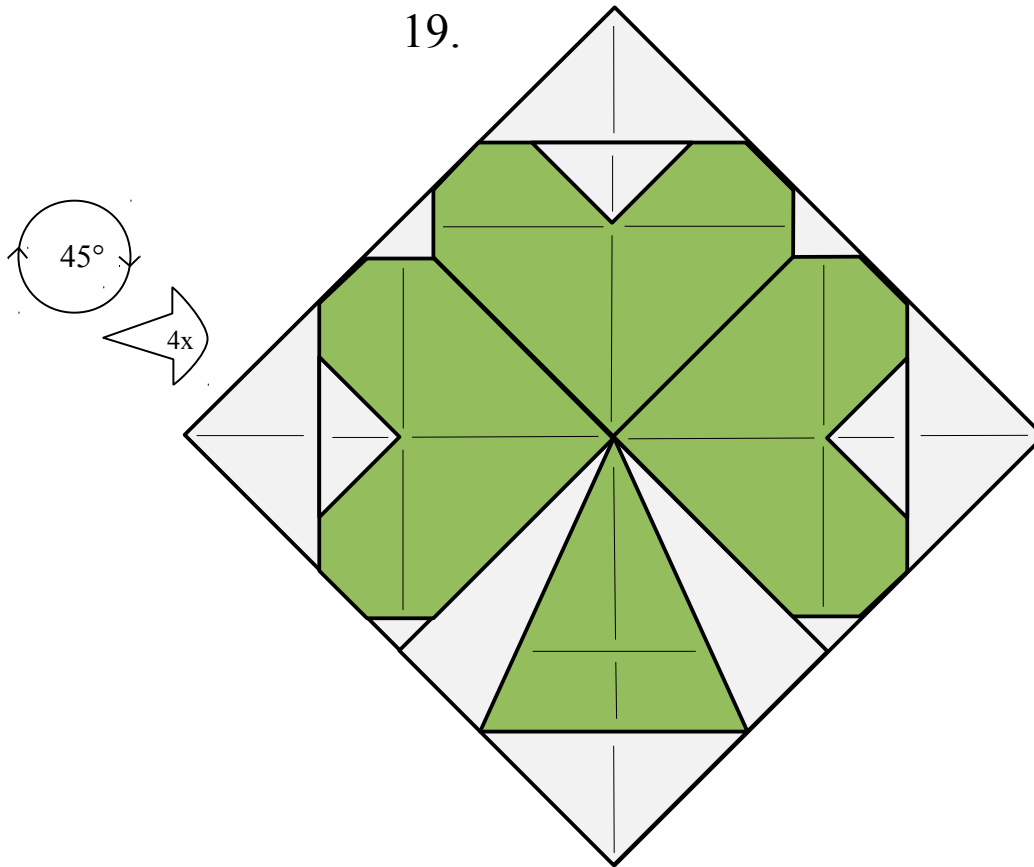

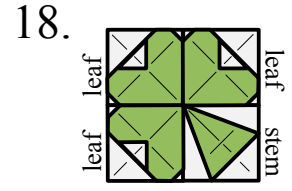

Make a tiny hem to round the leaves.

Unfold step 14.

Round the sides of the leaves using tiny mountain folds.

Done!
