Recommended Paper: thin 3-6"
( $75-150 \mathrm{~mm}$ ) paper-backed foil.
1.

2.

4.

Pre-crease.

Hood (a.k.a. outsidereverse) fold.

Swivel fold.
Repeat behind.

Mountain fold to the inside. Repeat behind.

Fold down front and back to $90^{\circ}$, spread-squashing the inner layer. Model becomes 3D.
13.

Dog-ear the inner layers to lock the end together.
14.

New view.

Fan out the layers and flatten.

Mountain fold $90^{\circ}$ along

Mountain fold $90^{\circ}$ along
the color-change to bring the handle down.
 for a garden shovel.

22.
...or if you skipped step 19 to make the garden shovel instead...

Done!

Shape the blade a bit, giving the center a bit of curve, as well as the part to step on to push it into the ground.
